Projects

SpaceCamp   Live • GitHub
Project management platform, built with Ruby on Rails and Backbone.js
- Create, share, and discuss projects
- Upload user profile pictures to Amazon S3
- Log in through Google using OAuth integration
- Extends the Backbone view class with a CompositeView class, which allows subviews to be easily added and removed from views

Asteroids   Live • GitHub
Browser game built using JavaScript
- Uses the HTML5 Canvas element to create the game's field of view
- CreateJS library complements Canvas to allow images and effects

Chess   GitHub
Fully functional game of chess
- Leverages Ruby's class inheritance for dry code
- Utilizes Colorize gem for enhanced User Experience

Skills

Ruby	JavaScript	jQuery	HTML	git
Ruby on Rails	Backbone.js	SQL	CSS	RSpec

Experience

Brown University   June 2014 - May 2015
Web Development Intern - Advancement Office   Providence, RI
